Introduction to Soroban Capital Partners

SOROBAN Capital Partners LP

- Founded in 2010
- $10+ billion in assets under management[1]
- Eric Mandelblatt, Managing Partner & Chief Investment Officer
- Fundamental research driven, value-oriented investment approach
- Focused on opportunities in high-quality growing businesses that exhibit barriers to entry and durable economic moats
- Long-dated capital base allows Soroban to underwrite to a multi-year investment horizon
- Internal partner and employee capital collectively represents the firm's largest single investor

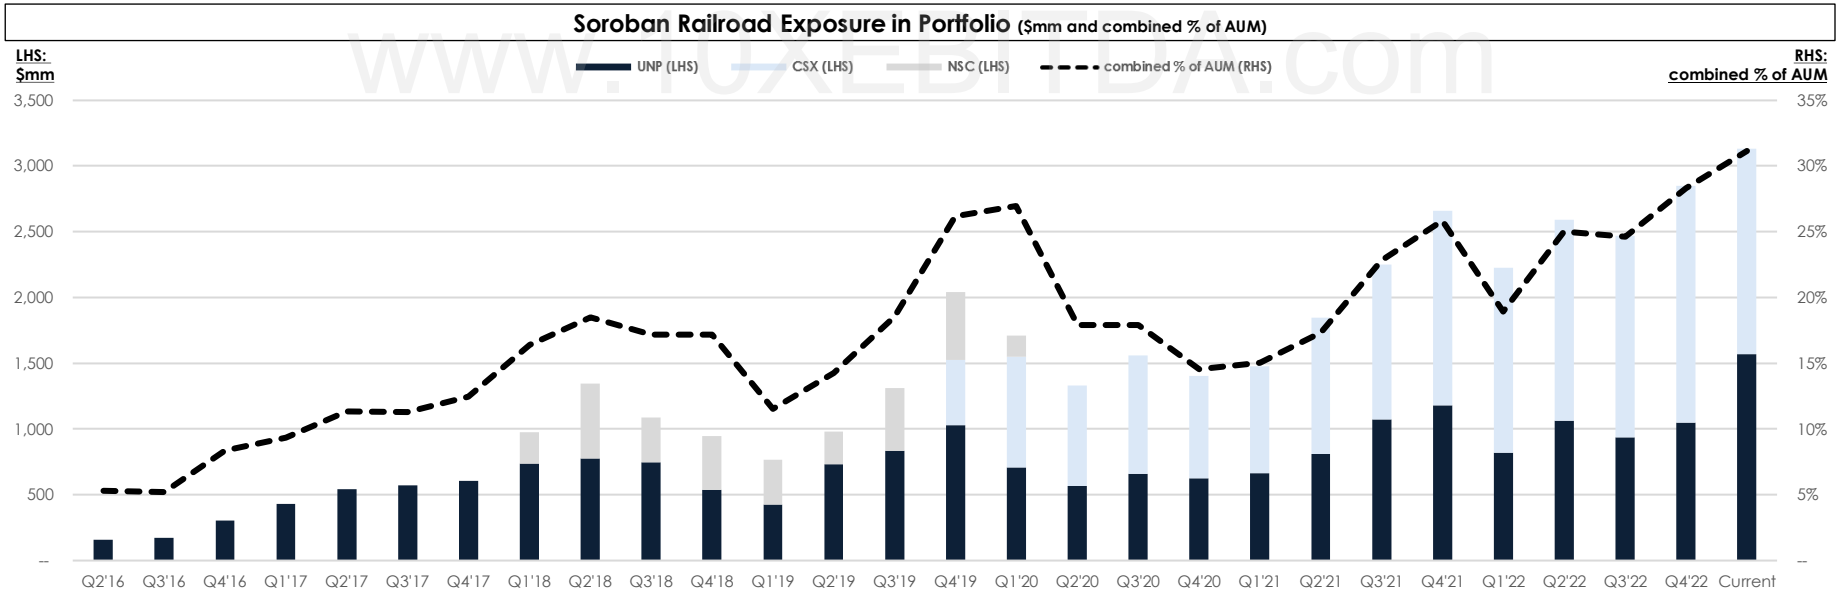

www.10XEBITDA.com

(1) Includes Soroban Opportunities Fund and Soroban Decarbonization Beneficiaries Fund.

Soroban's railroad industry experience

SOROBAN Capital Partners LP

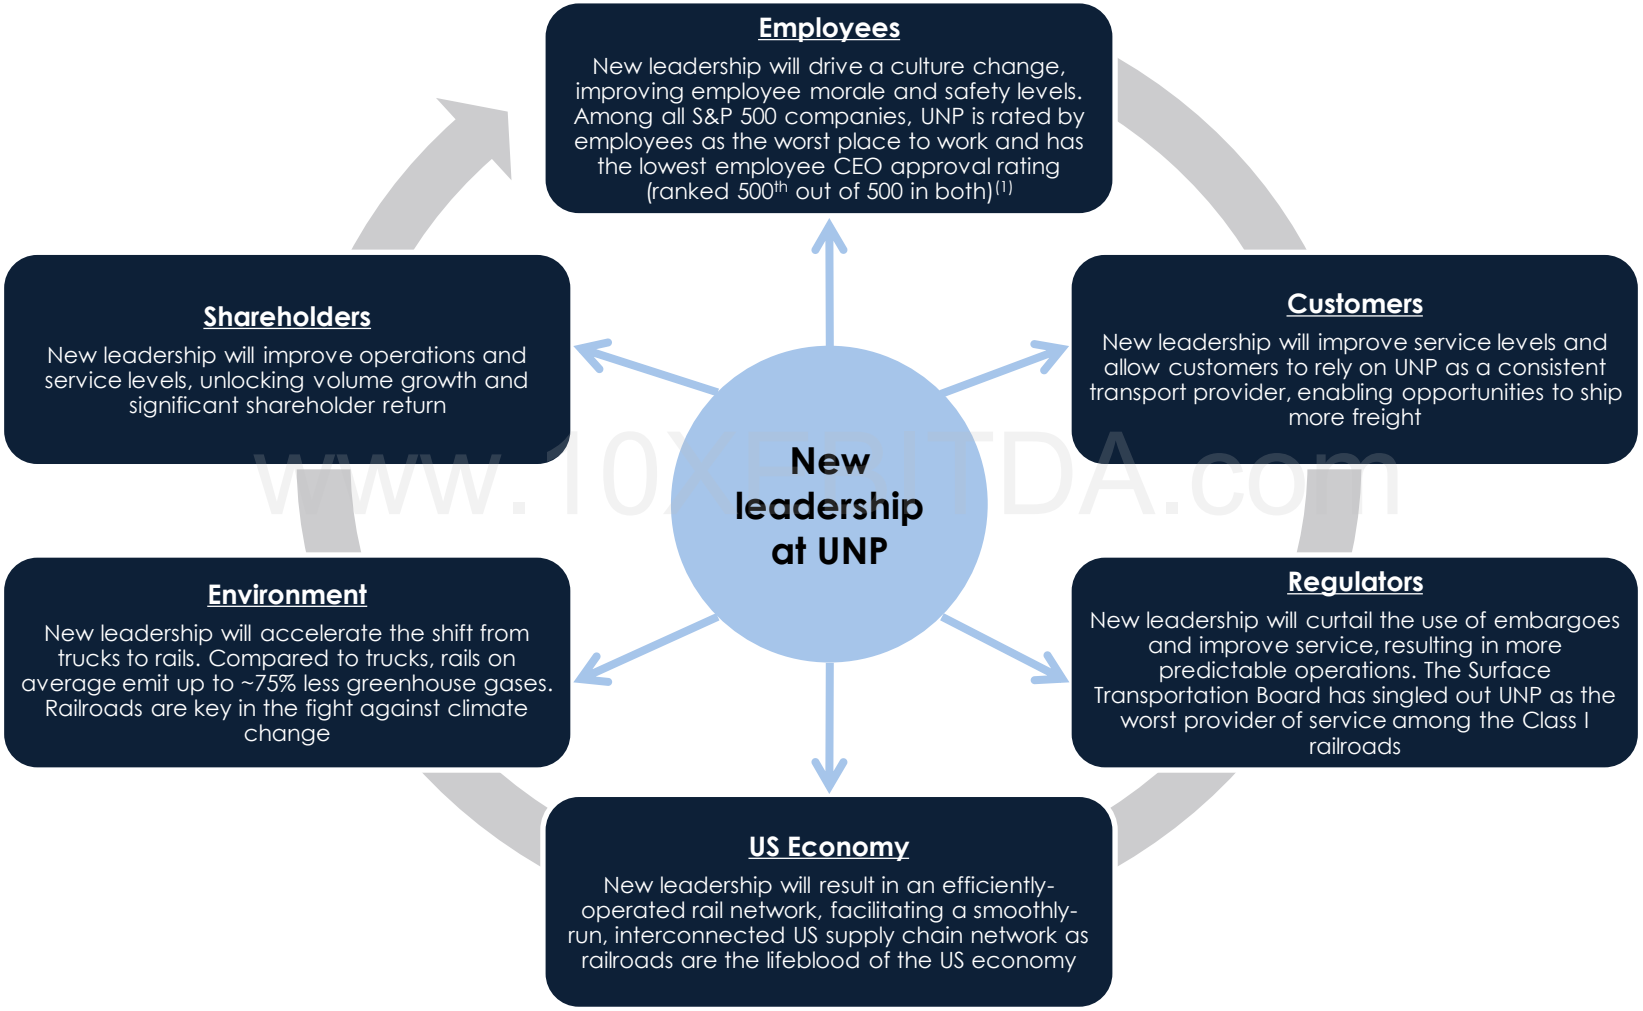

- Soroban has been a long-time investor in the North American Class I railroad industry. Soroban's investment partners have been among the largest railroad investors since 2005, with extensive industry relationships at management and Board level
- Today, Soroban owns a combined ~$3.1 billion of market value across two US railroads
  - UNP has been a significant investment for Soroban dating back to the second quarter of 2016. Soroban owns a ~$1.6 billion stake in UNP, making our firm a top 10 economic owner of the Company
  - Soroban owns a ~$1.6 billion stake in CSX (<3% of total company), making our firm the fifth largest shareholder
  - Soroban also previously owned NSC from 2018 to 2020
- Prior to founding Soroban, Eric Mandelblatt led TPG-Axon's investments in US railroads – the fund was a top shareholder of UNP, CSX, NSC, and BNSF from 2005 to 2010

Note: above figures include Soroban Opportunities Fund, Soroban Decarbonization Beneficiaries Fund, and Soroban Master Fund; as of 2/22/2023.

Soroban's mission

Soroban's mission is simple: we want UNP to prosper. Unlike typical shareholder engagements which come with numerous demands, Soroban has only one ask: install new leadership who can get the trains to operate safely and on time. The Company's key constituents are all aligned with this mission

www.10XEBITDA.com

(1) Glassdoor as of 2/22/2023; UNP is ranked last among the Class I railroads as well.

Situation overview

SOROBAN Capital Partners LP

Under Lance Fritz's eight-year tenure as CEO, UNP has repeatedly and significantly failed to reach its potential

- UNP has the **best** rail franchise in North America. Despite this, under current leadership UNP has been the **worst** performing Class I railroad
- Under Lance Fritz's eight-year tenure as CEO, UNP has ranked the **worst** in every key railroad operating metric: safety, volume growth, revenue growth, cost management, EBIT growth, and total shareholder return
- Key constituents have understandably lost confidence in Lance Fritz's ability to lead the Company
  - Shareholder returns have been the worst in the industry(1)
  - Employees are disgruntled: among all S&P 500 companies, UNP is rated by employees as the worst place to work and has the lowest employee CEO approval rating (ranked 500th out of 500 in both)
  - The Company is not delivering on its commitment to customers, and the Surface Transportation Board (regulator) has singled out UNP as providing the worst service among the Class I railroads
  - The US economy needs an efficient rail network to flourish, as railroads are the lifeblood of the US economy. UNP, one of the largest and most interconnected transportation assets, has the most inefficient rail network which has exacerbated the US supply chain crisis
  - The environment is negatively impacted as UNP is not fulfilling its potential as a decarbonization enabler
- Lance Fritz has continually failed to meet the annual incentive compensation targets set by the Board
- Simply put, UNP is not reaching its potential as North America's best Class I railroad. Management's poor track record results in the Company (i) not reaching its full earnings power and (ii) trading at a meaningful discount to its Canadian railroad peers and other high-quality industrial companies, thus significantly impairing shareholder value creation

www.10XEBITDA.com

(1) Among all public North American Class I railroads; shareholder returns include dividends.

The Board needs to replace Lance Fritz with best-in-class leadership

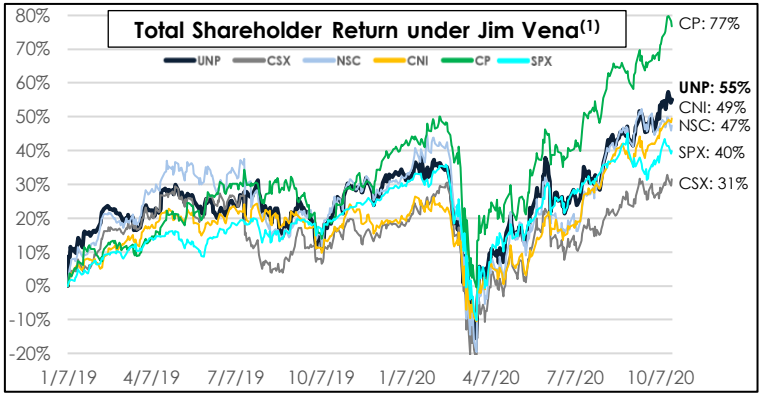

- Well-run operations are the enabling foundation for all other value creation levers of a railroad. Therefore, it is paramount the next leader of the Company has a proven track record of railroad operating excellence
- When the Board brought on Jim Vena, an operational expert with deep railroading experience, as COO to fix UNP's operations in 2019, he very quickly established what was possible for the Company, rapidly transforming UNP from an underperforming to a top performing railroad. Operations almost immediately reverted to worst-in-class levels without Jim Vena
  - UNP's market capitalization increased ~$9 billion on the day he was announced as COO and decreased ~$13 billion in the two days following his announced departure (~9% stock price move on both announcements)
- Fortunately, as it relates to new leadership, there is no need to start from scratch. Jim Vena has remained engaged in the industry following his departure from UNP. We believe he would be keen to return to UNP in a new leadership role
  - Jim Vena benefits from his deep knowledge of UNP's culture, employees, customers, and network
  - No internal candidates are remotely as qualified as Jim Vena, and he is the leading external candidate available

www.10XFINDA.com

Jim Vena

- COO of UNP from 2019-20; strong track record of operational success and shareholders' trust
- During his tenure as COO, UNP ranked second among peers[1] in total shareholder return
- Previously at Canadian National; during his tenure as executive vice president and COO of Canadian National, the company generated the industry's best operating ratio and achieved the best safety incident ratio in company history
- Currently serves on the Board of FedEx

Note: total shareholder return includes dividends. (1) Includes all public Class I railroads, excluding KSU due to acquisition announcements/rumors during timeframe; calculated from Jim Vena's announced hire to announced departure.

The Board's primary responsibilities

SOROBAN Capital Partners LP

- The Board's primary responsibilities are as follows:
  - Hire the best CEO and management team
  - Establish ambitious targets, monitor performance, and help set strategy
  - Develop talent and succession plans
  - Hold management accountable for execution

www.10XEBITDA.com

To fulfill these duties, the UNP Board must address eight years of staggering underperformance and immediately make a change in leadership. It is imperative for the Board to pair the best railroad in North America with the best leadership team

Conclusion

SOROBAN Capital Partners LP

New leadership at UNP would create significant value for shareholders and benefit other key constituents. We believe a leadership change could potentially create ~$67bn of incremental shareholder value over the next two years

- Under Lance Fritz's eight-year tenure as CEO, UNP has repeatedly and significantly failed to reach its potential. The Board needs to hold Lance Fritz accountable for UNP's failures and replace him
- Ultimately, the need to replace Lance Fritz is not personal but about elevating the interests of the Company and its key constituents above those of management. UNP deserves better leadership. It is time for the Board to act
- Experienced operational leadership is critical for unleashing UNP's potential…
- …fortunately, there is no need to start from scratch. We believe Jim Vena would be keen to return to UNP in a new leadership role

Under new leadership, we believe UNP's stock price has the potential to double over the next two years

	Best-in-Class Management Case	Sell-Side Consensus
2025E EPS	$17.90	$13.83
(x) NTM EPS Multiple	21.2x[(1)]	16.3x
Implied Share Price at 12/31/24	$380	$225
(+) Cumulative Dividends	10	10
Total Shareholder Return at 12/31/24	**$390**	**$236**
Upside (%)	*104%*	*23%*
IRR (%)	*47%*	*12%*
Market Capitalization at 12/31/24 ($bn)	$194	$127
Market Capitalization Created Under New Leadership ($bn)	*67*	

Soroban is completely committed to seeing that these changes be expeditiously implemented

Note: as of 2/22/2023. (1) Average blended 12-month forward P/E multiple of UNP's Canadian railroad peers.

UNP is the crown jewel North American transportation asset…

SOROBAN Capital Partners LP

UNP's rail network has many distinct advantages, including:

- Unique network configuration
  - Longer length of haul, creating wider competitive moats vs. trucking competitors
  - Lack of low-density "spiderweb" track arteries into multiple sub-markets, enabling high density lanes across the core of the network and flexibility to shift capacity to alternative markets as freight demand rises and falls
- Ideal geographic location
  - Located in the Gulf Coast and Southwest US markets, with higher population growth and investment levels vs. the rest of the US
  - Excellent access to Mexico, with border crossings at all six major gateways
- Merchandise-heavy product mix

Investors have historically recognized UNP's inherent advantages and status as the crown jewel transportation asset(1)

- "*UNP operates undoubtedly one of the best rail franchises on the continent…*" – Evercore ISI
- "*…the inherent structural advantages of UNP's network that has made UNP our top pick in Rails for a long time*." – Deutsche Bank
- "*…we continue to think that UNP has a structurally advantaged network with its very long length of haul and diversified biz mix*." – Credit Suisse
- "*…stellar franchise…*" – Raymond James
- "*A well-diversified asset base… we recognize the competitive dynamics of UNP's network– unparalleled access to Mexico and the chemicals sector in the U.S. Gulf Coast – and diversified revenue stream…*" – RBC
- "*The most diversified franchise with a higher level of return, UNP is in a very good position…*" – Bernstein
- "*Bottom line, we believe UNP should generate near the high end of rail OR improvement… based on UNP's premium rail franchise…*" – Goldman Sachs
- "*…a franchise advantage over other rails…*" – UBS
- "*Union Pacific has a desirable long-haul network with a more lucrative mix of business…*" – BMO
- "*…consider upgrading the stock… based on the very high quality of the company's network franchise.*" – TD Securities

WWW.TOKERDA.COM

(1) Research reports.

…and management has consistently stated that UNP has the best railroad franchise in North America

SOROBAN Capital Partners LP

- October 2012 investor day: "*…we believe Union Pacific is the best franchise in the industry*."
- November 2014 investor day: "*We fundamentally believe, you've heard us say it before, that we really do have the best franchise in the railroad industry*."
- July 2015 earnings call: "*Again, I want to emphasize what we've constantly focused on with our investors, and that is we've got an industry best franchise.*"
- February 2016 conference: "*…leveraging what we think is the best franchise in North America. …we have what we would define as the best physical footprint*."
- February 2017 conference: "*…I would argue that we have the best rail franchise in the United States.*"
- May 2017 conference: "*But I will tell you that I think we do have the best franchise. …that gives us the best leg up and frankly, we should be the best*."
- May 2018 conference: "*…we do believe we have the best franchise. … We've always been very proud of our franchise.*"
- June 2018 conference: "*…I believe, given our diverse strength in our network, I believe, structural advantages, we should have the best operating ratio in North America*."
- February 2019 conference: "*…we think we have the best network with the most diverse network, with the most reach. You look at our Mexico franchise, our Gulf franchise, our ports, I mean just kind of look at the map, I believe we should have the lowest operating ratio of all the North American railroads, I've always believed that.*"
- December 2019 conference: "*I believe that if you look at our network and the reach, the length of haul, the diversity, having a crossing at every point in and out of Mexico, I mean, just the inherent advantage is the Gulf Coast, the ports, et cetera, et cetera, et cetera. We do have inherent advantages…*"
- May 2020 conference: "*…with everything that we have, we have the opportunity to have the best [operating ratio]. We've got a great length of haul. …we should be the best operating ratio company in North America* "
- July 2020 earnings call: "*…great network… this railroad has the capability to be the best margin railroad in North America, lowest operating costs, bar none*."
- May 2021 investor day: "*We have the best franchise in North America. …we've got one of the lowest cost structures in the industry. …we're going to have one of the best, if not the best, operating ratio going forward from this point*."
- November 2022 conference: "*Why are we bullish? Why did you hear Kenny talk so confidently? It's because as we look into 2023, we think we're well positioned to outperform not just industrial production, but the railroad industry in general. Why is that? We've got the best franchise*."

WWW.10XEBITDA.COM

However, under current leadership UNP has been the **WORST** performing railroad

SOROBAN Capital Partners LP

Despite having the best rail franchise in North America, UNP has unequivocally been the worst performing Class I railroad under current eight-year leadership

UNP led the industry in operational improvement before current leadership and during Jim Vena's COO tenure

SOROBAN Capital Partners LP

Before current leadership, UNP showed industry leading operational improvement. Under current leadership, performance flatlined… until Jim Vena joined and drove immediate success… only to have UNP rapidly regress after Jim Vena's departure

UNP Operating Ratio Progression

www.10XEBITDA.com

Source: company filings. Note: operating ratio or "OR" represents 1 – EBIT Margin; lower OR = better. (1) Represents Jim Vena's last fiscal quarter with UNP (Q4'20).

Current leadership has repeatedly failed to deliver on its promises

SOROBAN Capital Partners LP

For eight years, current leadership has consistently failed to grow volumes and reach its OR profitability targets

Failed to Grow Volumes (eight-year cumulative decline of 15%)

Promise	Result[1]
April 2015: "*And so we feel still quite bullish about, in the long term, being able to grow based on this great franchise.*"	-15% volume growth since Q1'15 **MISSED**
October 2016: "*…we feel pretty positive about the run rate opportunity. … We still think that there are good opportunities to grow volume.*"	-4% volume growth since Q3'16 **MISSED**
November 2016: "*…our thesis is that we'll see positive volumes over the long planning horizon.*"	-4% volume growth since Q3'16 **MISSED**
February 2017: "*But to the volume side of the discussion. Our thesis is that between now and then, we will see positive volume.*"	-3% volume growth since Q4'16 **MISSED**
November 2017: "*…our longer-term thesis is that we certainly want volume to be on the positive side. …if I could write a script right now, I'd say 1% to 2% volume growth is, if you can kind of book that long term, that's a fabulous number.*"	-5% volume growth since Q3'17 **MISSED**
February 2018: "*And as we look longer term… our belief in our planning assumption is that it will be positive volume environment… We're confident in our ability to grow our business.*"	-5% volume growth since Q4'17 **MISSED**
October 2019: "*Clearly, we would love to have additional volume. With a more consistent and reliable service product, we are poised to grow our business.*"	-5% volume growth since Q3'19 **MISSED**

Failed to Reach Long Promised 55% OR (despite seven years of reassurances)

Promise	Result[2]
February 2016: "*…we've got our entire organization focused on looking beyond even that and looking to a 55 operating ratio.*"	**Then/Now** 64%/60% **MISSED**
November 2016: "*It ties to our looking even beyond that to a 55% operating ratio.*"	64%/60% **MISSED**
June 2017: "*…we're working towards and have real action plans to get there towards the 55% operating ratio.*"	63%/60% **MISSED**
September 2018: "*We have not yet put, as you know, a date on when we expect to achieve the 55% OR. But I would say that it is in our sights…*"	63%/60% **MISSED**
April 2019: "*And we've, for quite some time, said we think we're capable of a 55%... we are more confident than ever that we're capable of a 55%.*"	61%/60% **MISSED**
December 2019: "*And we still have all the confidence in the world that we can ultimately get to a 55%.*"	61%/60% **MISSED**
May 2020: "*Yes, I wouldn't talk to 55 as a limit. For us, it's a target. …we feel confident that's still an appropriate target.*"	58%/60% **MISSED**
December 2020: "*…we are laser-focused on achieving that 55%. It's been a long-term target for us, and we're more confident now than ever in being able to achieve it.*"	58%/60% **MISSED**
Finally time stamped 55 OR target for 2022 after 5+ years of introducing target	
May 2021: "*But let me give you a quick spoiler alert: we will achieve a 55% operating ratio in 2022.*"	**MISSED by ~500 bps**
January 2022: "*…we're on track to achieve a full year operating ratio that starts with a 55% in 2022.*"	Reassured… then **MISSED by ~500bps**
January 2023: "*…to your 55 questions, I mean you've heard us talk that, that is still our goal, and I'll reiterate that again. We have not put a new timeline on that…*"	Back to a goal and timeline removed

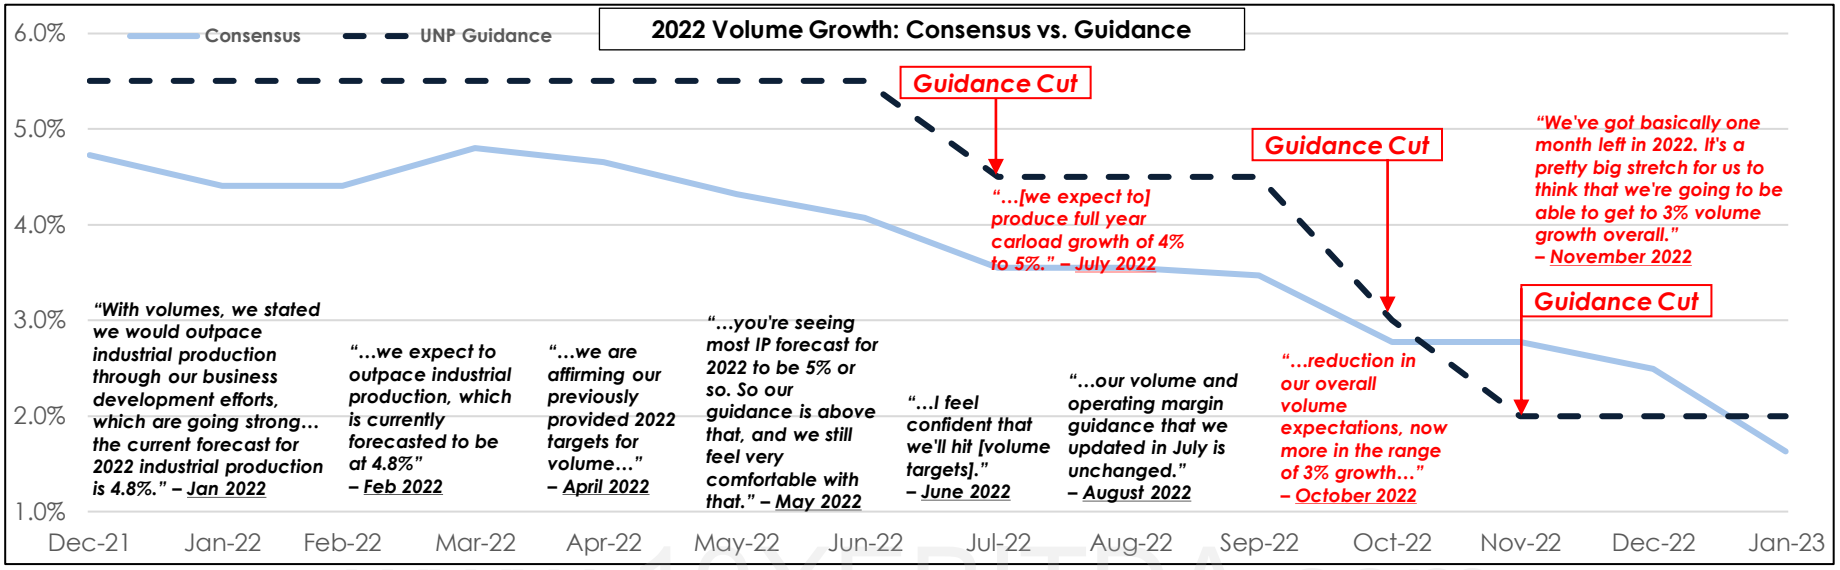

www.ICBEDA.com

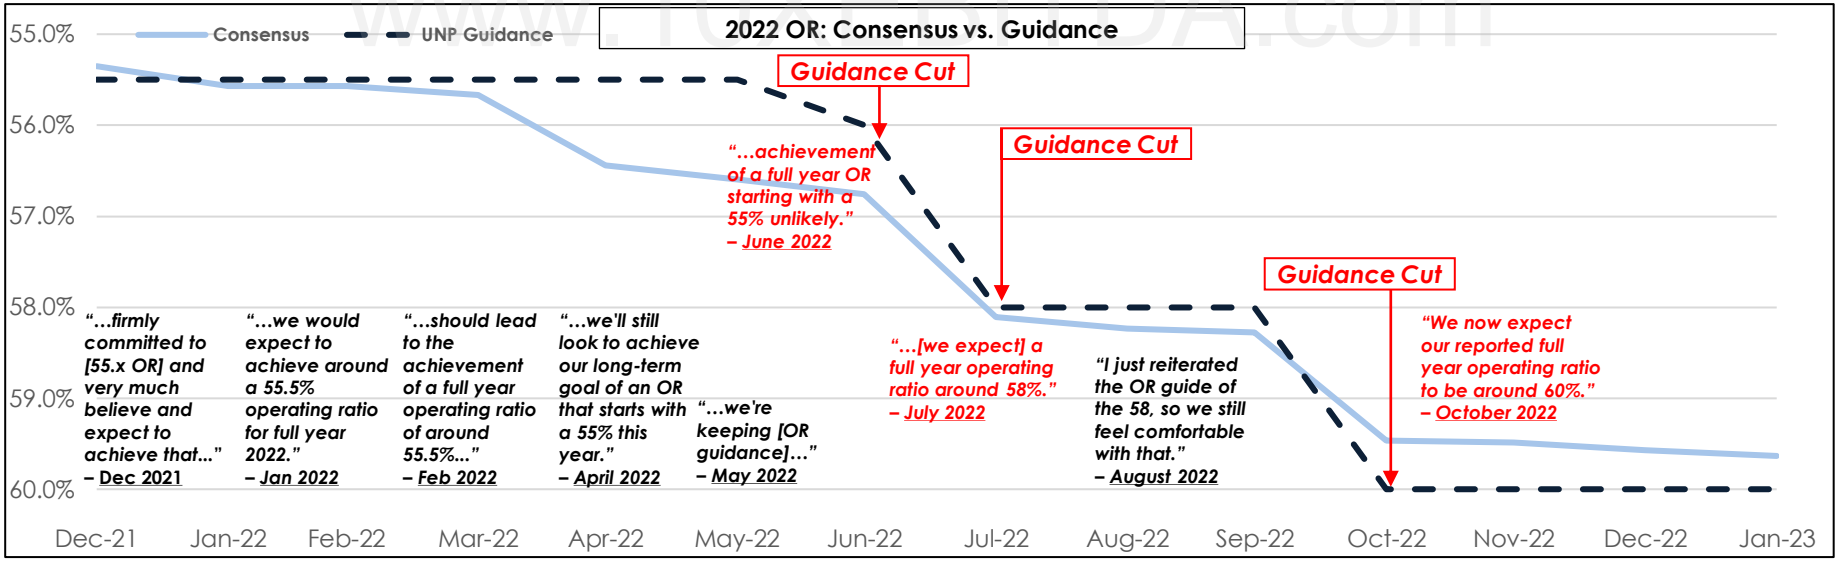

(1) Volume growth calculations uses LTM volumes of quote's date as the start and 2022 volumes as the end. (2) "Then" represents OR on the fiscal year of the quote's date.

UNP's history of underperformance is highlighted by three successive guidance cuts on volumes and OR in 2022

SOROBAN Capital Partners LP

Continued operational mismanagement and poor messaging have caused investors to lose confidence

www.10XERTDA.com

Source: Bloomberg and Visible Alpha consensus estimates.

Investors have understandably lost confidence in current leadership's ability to lead UNP to its full potential

SOROBAN Capital Partners LP

- **Before Jim Vena, analysts had consistently expressed skepticism around management's ability to execute**
  - October 2016 earnings call: "*Given the trends that we're exhibiting, the reversal in those trends, I'm just trying to understand what confidence that we can put in a reasonable timeframe, long term is a fairly vague definition, a reasonable time frame for evolution toward a 55% OR.*" – RBC
  - April 2017 earnings call: "*One of the pushbacks we get in sort of recommending your stock is that there is a perception out there that maybe management is a little bit taking their time on the margin side. There isn't as much of a sense of urgency.*" – Bernstein
  - July 2017 earnings call: "*Lance, I wonder if you could just give your investors a little bit of confidence… you guys have had some pretty significant OR targets out there for some time now.*" – Barclays
  - September 2017 research report: "*Our analysis shows a significant efficiency gap between Union Pacific and its peers… This structural opportunity is execution-dependent but we sense the productivity improvement momentum currently occurring in the U.S. railroads, in part due to the management changes at CSX, provides significant incentive for management to attack this opportunity with more vigor.*" – BMO
  - April 2018 research report: "*…we expect that management will begin to act with a sense of urgency to restore investor confidence (or will face increasing pressure to do so).*" – Bernstein
  - July 2018 earnings call: [on relative underperformance vs. peers] "*…this is a tough question. But Lance, is there a sense of urgency that's been elevated?*" – Deutsche Bank
  - July 2018 research report: "*Ultimately, management needs to deliver better cost performance and under constant questioning they remained steadfast in their outlook to do so… we believe pressure will build on management to execute well.*" – Citi

- **Since Jim Vena left as COO, analysts have begun questioning management's execution again, asking sharp/pointed questions**
  - July 2022 earnings call: "*…I just want to understand what's embedded in the back-half guidance or the revised full year guidance? Because this is now the second time in, I don't know, 40-45 days that we're revising the full year outlook. …there are a few people out there that have many decades of PSR experience that have seen PSR implemented… Those guys seem to be available on a consultancy basis. I don't know if there is scope to bring in somebody on a short-term basis to accelerate some of the progress… Is that something that you're considering or looking at doing?*" – Deutsche Bank
  - July 2022 earnings call: "*I want to ask just a bigger picture question. I think some people are questioning the success or maybe the sustainability of PSR. … We were supposed to do at 55% this year on our way to a lower low to mid-50s OR in a couple of years. Are those just the wrong numbers to be thinking about now for the OR over time?*" – Wolfe
  - October 2022 earnings call: "*And then for next year, I heard the word confident a lot. …but not confident enough to give the OR guide for next year of 55%. ...is 55% achievable for next year?*" – RBC
  - January 2023 earnings call: "*…you laid out a multiyear productivity improvement for the network. …are you confident that you can eventually obtain the aggregate plan over time? …reset at a lower level going forward?*" – Evercore ISI
  - January 2023 earnings call: "*…can you talk a little bit to the longer-term transition plans? What skill sets do you think the Board really is focused on for the next leader of the business.*" – Susquehanna
  - January 2023 research report: "*After a period pre-pandemic where significant improvement in operating efficiency resulted in the mgmt. team at the time boasting a forecast for an 'industry leading O/R,' mgmt. has now backed off that objective… Looking back to the period late 2016 to early 2019, that time was characterized by guidance that lacked conviction, a dearth of PSR expertise at the mgmt. level and (ultimately) sub-par operating results. Fundamentally, we are concerned that we are entering a new period characterized by the very same challenges.*" – RBC

No one, including UNP management, believes the May 2021 investor day guidance

SOROBAN Capital Partners LP

Compared to the investor day guidance from less than 2 years ago, investors are now expecting UNP to grow volumes at only one-third of guided levels and grow revenue at half of guided incremental margins

- Awful execution in 2022 combined with a long history of operational mismanagement have led to widespread skepticism of UNP's ability to achieve the key targets established in May 2021. Consensus estimates are **significantly below** for all key investor day targets
- Current management no longer expresses confidence in achieving its long-term guidance in a timely manner
  - November 2022 conference: [on 55% OR target, which was supposed to be achieved in 2022] *"It's not going to be the goal for next year."*
  - January 2023 earnings call: [on long-term targets from investor day] *"…it may be over a longer period of time that those actually come to fruition. …the biggest opportunity is to improve that service product that from it drives out that excess cost when we think about our locomotive and our workforce productivity. That's job #1 right now…"*
  - January 2023 earnings call: [on 55% OR target, which no longer has a timeline despite initially guided for 2022] *"…to your 55 question, I mean you've heard us talk that, that is still our goal, and I'll reiterate that again. We have not put a new timeline on that because of all the things that you've heard us talk about here today in terms of the challenges that we're facing."*

www.10XEBITDA.com

	Investor Day Long-Term Guidance (2021-24)	Consensus Long-Term Estimates (2021-24)	vs. Investor Day
2021-24 Volume Growth	*"exceeding industry production, ~3% CAGR"*	~1% CAGR	**Significantly BELOW**
2021-24 Incremental Margins	*"mid to high 60% incremental margins"*	~34% incremental margins	**Significantly BELOW**
2022 OR	*"55.x%; industry leader"*	~60% OR (actuals)	**Significantly BELOW**
2024 OR	*implied ~53% OR based on sales growth and incremental margin guidance*	~59% OR in 2024	**Significantly BELOW**
2021-24 EPS Growth	*"low double digit EPS growth CAGR"*	~8% CAGR	**Significantly BELOW**

Source: Bloomberg and Visible Alpha consensus estimates as of 2/22/2023.

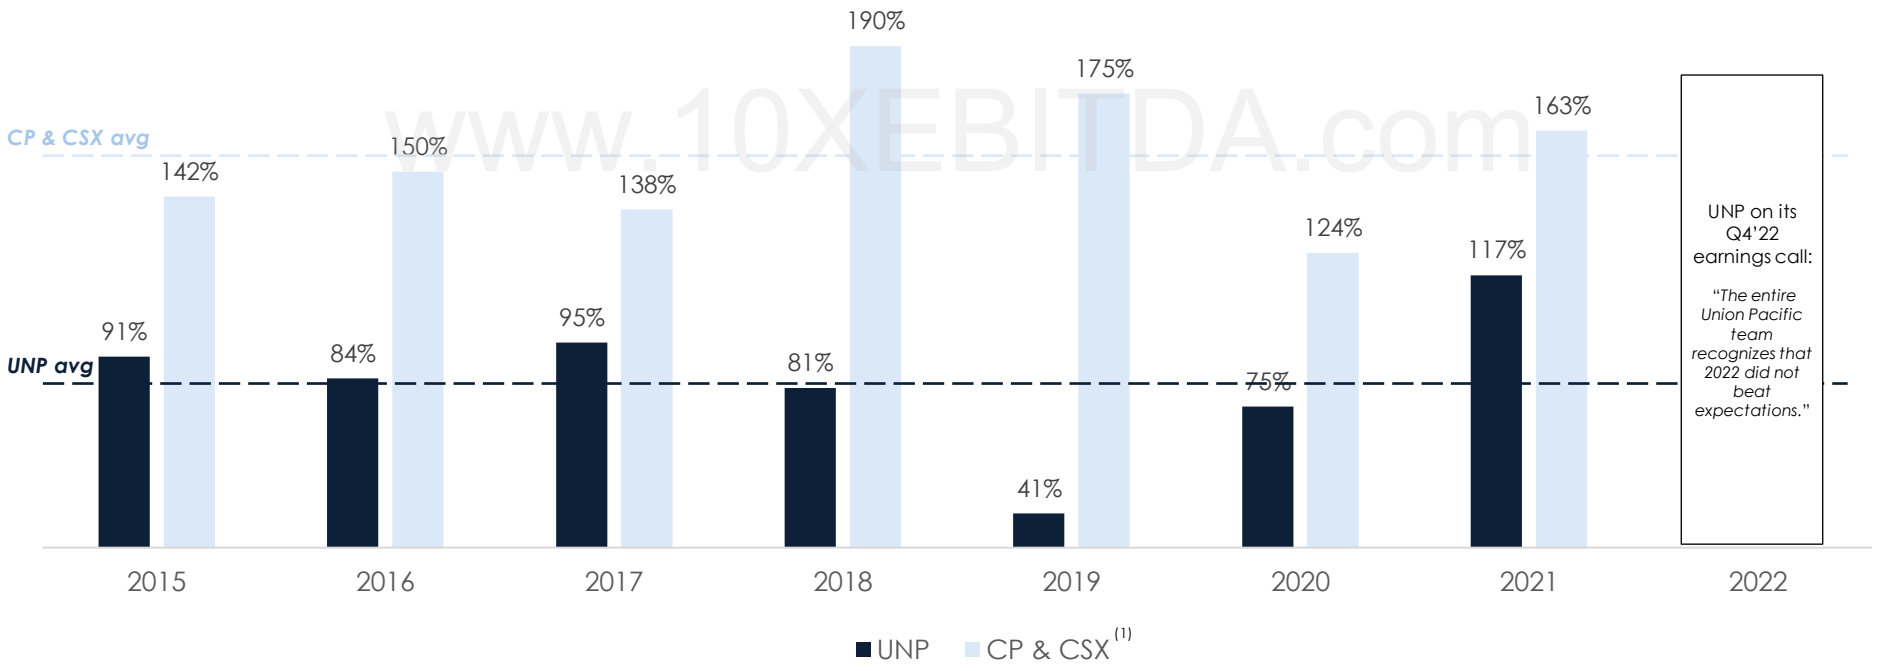

The Board clearly recognizes Lance Fritz's subpar results given his consistent failure to meet incentive compensation targets

SOROBAN Capital Partners LP

Lance Fritz has consistently failed to reach internal targets established by the Board over his eight-year tenure as CEO. It is clear he is not performing up to the Board's standards

- UNP's annual incentive compensation bonus is determined from financial targets (operating income and operating ratio) and business objectives (safety, service, etc.)
- As CEO, Lance Fritz has only been earning ~83% of a 200% potential annual incentive bonus (only one year above 100%). This is a low earn rate and significantly below the best-in-class railroad CEO average of ~155%

Management Annual Incentive Bonus

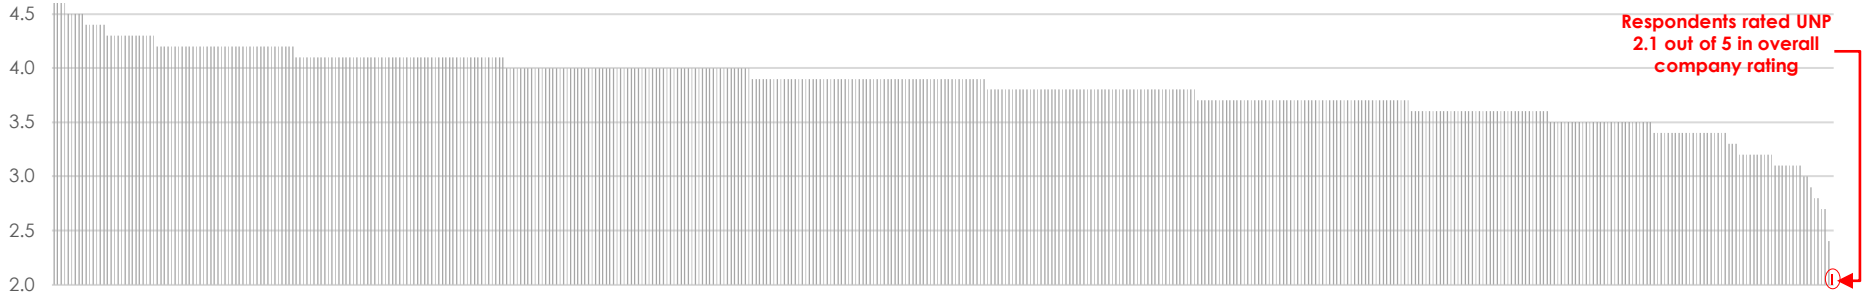

www.10XEBITDA.com

Source: company filings. Note: UNP's 2015-17 annual incentive bonus only discloses $ amount. % is calculated using the Board's 2017-21 target $ for Lance Fritz, which has remained constant.
(1) Represents annual incentive bonus for Hunter Harrison/Keith Creel at CP and Jim Foote at CSX.

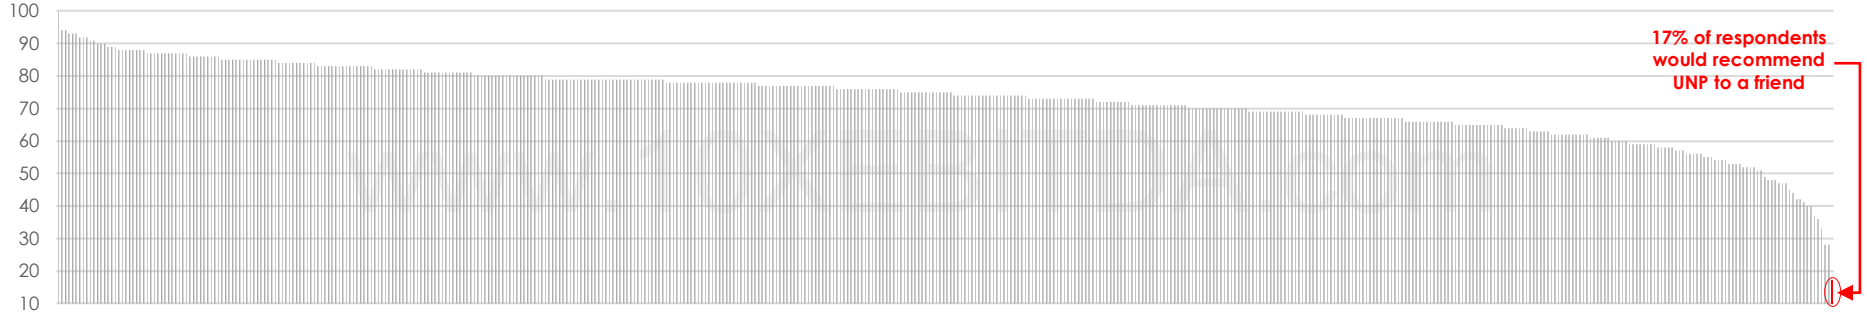

UNP employees are disgruntled with leadership, resulting in low employee morale…

SOROBAN Capital Partners LP

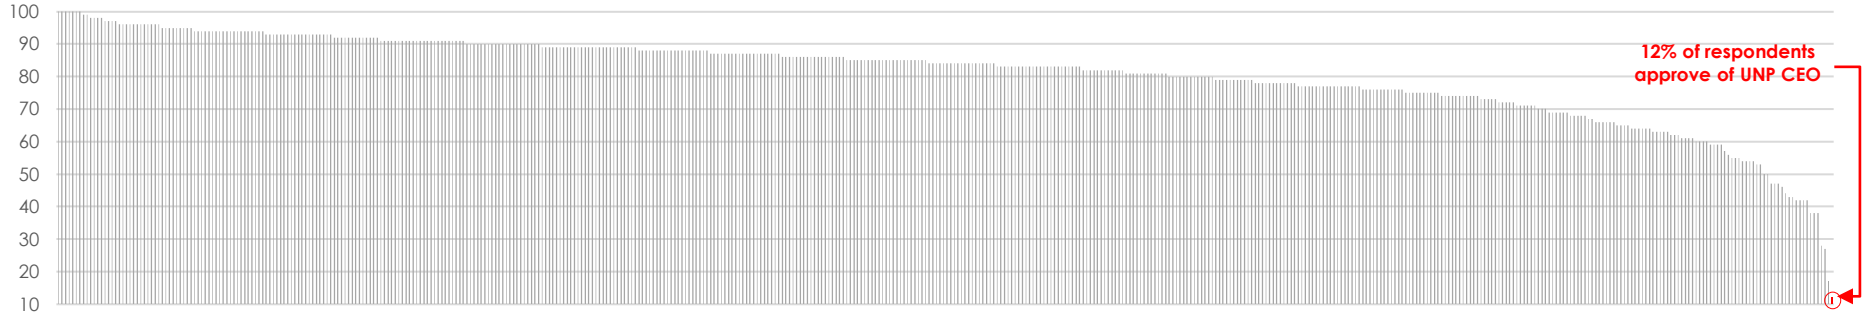

Ranked 500th out of 500 among S&P 500 Companies in Employee Ratings: "Overall Rating" (out of 5)

Ranked 500th out of 500 among S&P 500 Companies in Employee Ratings: "Recommend to a Friend" (%)

Ranked 500th out of 500 among S&P 500 Companies in Employee Ratings: "Approve of CEO" (%)

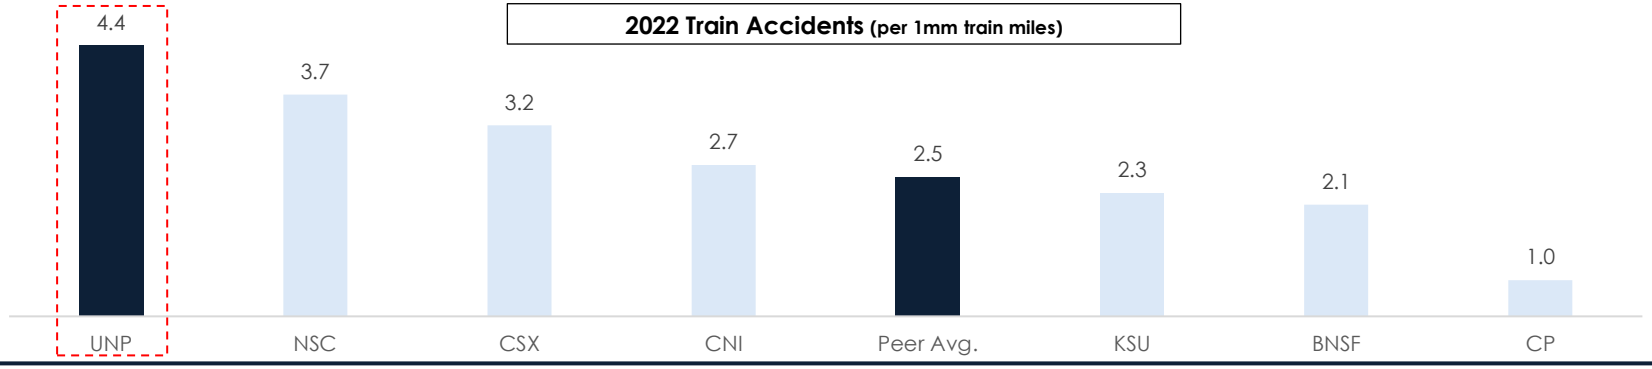

Source: Glassdoor as of 2/22/2023. Note: UNP is rated the worst on the above metrics among the Class I railroads as well.

…and partly the result of worst-in-class safety metrics

SOROBAN Capital Partners LP

- UNP's recent employee safety results have been unacceptable. Employee safety is paramount and highly correlates with well-run operations
- UNP has hired external safety consultants to address its safety problems, which is a clear sign of a weak grasp of operations. No other Class I railroad has publicly acknowledged the need for third-party safety consultants
- Management has consistently referred to employee safety results as "mixed" or "did not meet expectations"
  - *"Year-to-date, our safety results have been mixed. …personal injuries increased. … As I mentioned at the start,* ***we must improve our safety performance****."* – July 2021
  - *"One area of continued focus by the team as you've heard us talk about this morning is safety…* ***our safety metrics lag 2020****…"* – October 2021
  - *"…our fourth quarter safety and service performance* ***did not meet expectations****. … We have engaged an external safety partner to focus on advanced risk identification and mitigation, coupled with enriched behavioral safety programs. …it's imperative that we make progress on safety."* – January 2022
  - *"****Safety results have been mixed to start the year*** *as we implement enhancements to our safety programs through partnerships and guidance from our external safety consultant. …we've had an* ***uneven start to the year with safety****, but we're not deterred. We're in the process of implementing changes to our safety programs as a result of our work with experienced safety consultants."* – April 2022
  - *"…the* ***derailment rates have not yet improved compared to 2021****…"* – July 2022
- Former executives have expressed concerns around management's handling of employee safety
  - *"In the past it was always interpreted fairly if an injury on the job occurred. Now, as employees have seen, if you report an injury the* ***company will come back with the argument that the injury only occurred because the employee was negligent*** *in following safety rules no matter the situation. Not following safety rules is cause for dismissal. So,* ***employees have gotten the message not to report injuries or problems****… retaliation against whistleblowers is rampant."* – Former UNP Executive[1]
  - *"****I think safety program is not as heavily [handled] on the accountability piece****. I think that has really hurt their brand. Not holding people accountable for rules violations that are extremely serious in nature. They became very lenient on how they handled those situations."* – Former UNP Executive[2]

Consistent with prior years, UNP continues to deliver worst-in-class safety metrics, nearly 2x worse than the peer average

Source: Federal Railroad Administration – Office of Safety Analysis (reporting level: system). Note: 2022 represents latest data available as of 2/22/2023.

Regulators have singled out UNP as the worst operated railroad

SOROBAN Capital Partners LP

- UNP is facing unprecedented pressure from the Surface Transportation Board ("STB"), who has **singled out UNP as providing the worst service among the Class I railroads**. Pressure is escalating as UNP continues to fail to meaningfully improve service
  - *"UP's May 20 response to the Board's May 6 Order was by far the worst of all the carriers and reflected an attitude of indifference to the documented effects of its service deficiencies on its customers and of disregard for the Board's statutory oversight of the freight rail industry."* – STB Chairman Martin Oberman (6/13/2022)
- The STB requested that Lance Fritz attend a hearing on UNP's "substantial" increased use of embargoes
  - *"The Board has received numerous reports that shippers are suffering supply chain problems as a result of the embargoes… The Board notes that UP carries nearly 27 percent of freight served by rail and nearly 11 percent of all long-distance freight volume. Therefore, disruptions in UP's service levels have a significant detrimental impact on the supply chain and the nation's economy."* – STB press release (11/22/2022)
- Despite the gravity of the situation, Lance Fritz failed to provide the adequate data ahead of the hearings per the STB's request, resulting in a public admonishment by Martin Oberman (STB chairman)
  - *"I am writing to inform you of serious concerns regarding Union Pacific Railroad Company's (UP) response to the Board's November 22, 2022 order. …failed to provide any detail on those topics, and it failed to provide any information or discussion of other topics. …silent on most of the topics listed in the November 22 order. … Unfortunately, UP's failure to fully respond to the order has hindered the Board in its efforts to understand this increase in the use of embargoes, and their causes and impacts."* – STB Chairman Martin Oberman, Letter to Lance Fritz (12/8/2022)
- Simply put, UNP's operations are so poorly run that it must purposely turn down business. According to seasoned railroading experts, these embargoes are not necessary and are an overwhelming sign of poor operational execution

WWW.LOXERITDA.COM

Embargoes by Class I Railroads in 2022

UNP stands out as the heaviest user of embargoes in 2022, nearly 10x the next closest Class I railroad.
UNP represents ~70% of all North American rail embargoes (more than all other Class I railroads combined)

Source: Association of American Railroads.

UNP failed to hit the service targets it established for the STB…

SOROBAN Capital Partners LP

Service metric targets established by UNP in its June 2022 STB filing with a timeline of year-end were significantly below 2019 levels, when Jim Vena led UNP's operations. Despite this, at year-end UNP missed 5 out of its 7 service metric targets

Railroad industry has a long history of experienced operational leadership improving outcomes

SOROBAN Capital Partners LP

As has been historically demonstrated, installing experienced operational leadership across the railroad industry has consistently and dramatically improved outcomes – it will be no different at UNP

Headline	Initial Board Reaction	Result
Pershing Square calls for management change at Canadian Pacific (2012)	• Defends CEO, saying targets are a "shot in the dark" and show a lack of understanding the industry and CP's reality • Hires independent consultant to support view that Pershing Square's OR target of 65% is not achievable since CP's rail network is characterized by steeper grades and greater curvatures vs. those of peers	• Existing CEO resigns and is replaced with Hunter Harrison (railroad operations expert with deep railroading experience); five other directors, including Chairman of the Board, were replaced with Pershing Square's Board nominees • Operation outcome: CP improves from the worst OR to best-in-class levels today (~2,000bps of improvement); operating ratio now significantly better than Pershing Square's original target of 65%, which was initially deemed impossible by the Board (61% OR today – expected to lower in coming years) • Shareholder outcome(1): best performing railroad stock over the next two years, outperforming peer average by ~80% and the S&P 500 by ~85% • Customer outcome: business wins lead to record volumes on railroad and best service metrics in company history
Mantle Ridge calls for management change at CSX (2017)	• Initially pushes back but quickly relents after pressure from other shareholders • Eventually receptive to management change and Mantle Ridge's operational plan; however, continues to push back against Mantle Ridge's proposals around CEO compensation and Board representation	• Existing CEO retires and is replaced with Hunter Harrison (railroad operations expert with deep railroading experience); three incumbent directors were replaced with all five of Mantle Ridge's Board nominees • Operation outcome: CSX improves from the worst OR to best-in-class levels today (~900bps of improvement) • Shareholder outcome(1): best performing railroad stock over the next two years, outperforming peer average by ~70% and the S&P 500 by ~95% • Customer outcome: business wins lead to volume outgrowth on railroad and best service metrics in company history
TCI calls for management change at Canadian National (2021)	• Responds with press release to counter TCI's "misleading claims" • Defends CEO and current Board representation • Doubles down on decision to pursue the acquisition of Kansas City Southern	• Existing CEO retires and is replaced with Tracy Robinson; existing COO is replaced with Ed Harris (railroad operations expert with deep railroading experience); TCI adds two independent directors to the Board; CNI does not acquire Kansas City Southern • Operation outcome: while still in progress, the first year under new management has been successful, highlighted by meaningful year-over-year improvements in service and safety metrics despite a challenging macroeconomic backdrop • Shareholder outcome(1): while still in progress, CNI has been the best performing railroad stock, outperforming peer average by ~15% and the S&P 500 by ~20% • Customer outcome: since the change in management, CNI has meaningfully improved service metrics, despite headwinds from supply chain constraints

After replacing existing management with experienced operational leadership, CP, CSX, and CNI have all been widely regarded as best in class among the North American Class I railroads

Note: peers include all public Class I railroads. (1) Includes dividends; calculation uses day before public rumors of shareholder engagement as starting date; CN shareholder outcome as of 2/22/2022.

Experienced operational leadership is necessary to drive operational and financial outperformance

It is imperative for the Board to act now to capitalize on the "golden age of railroading growth"

SOROBAN Capital Partners LP

Nothing in eight years of evidence suggests UNP's current leadership can capitalize on this unprecedented long-term growth opportunity, and UNP has significant excess capacity to support years of future capital-light, high margin growth

"Golden Age of Railroading Growth"

Trucking market facing structural headwinds		US undergoing new industrial investment super cycle		Increasing focus on scope 3 greenhouse gas emissions		Significant excess capacity on rail networks		Structural outlook for railroading growth has never been higher
Trucks, the main alternative to rails, are facing numerous structural headwinds that necessitate higher trucking rates. This will make rails more appealing relative to trucks (and enhance the pricing power of rails)	+	The US is poised for a new industrial investment super cycle, the result of a decade of underinvestment, reshoring critical supply chains, and decarbonization trends. This large capex will be disproportionally served by rails (heavy nature of materials)	+	Railroads are key in the fight against climate change. Compared to trucks, rails on average emit up to ~75% less greenhouse gases. As a result, we expect rails to be significant market share gainers	+	UNP currently has substantial excess capacity, meaning additional volumes require de minimis capital investment (UNP only running at ~80% of full network potential today). Incremental volumes will come at very high margins	=	**It is imperative for the Board to act now to change UNP's leadership in order to capitalize on the "golden age of railroading growth"**

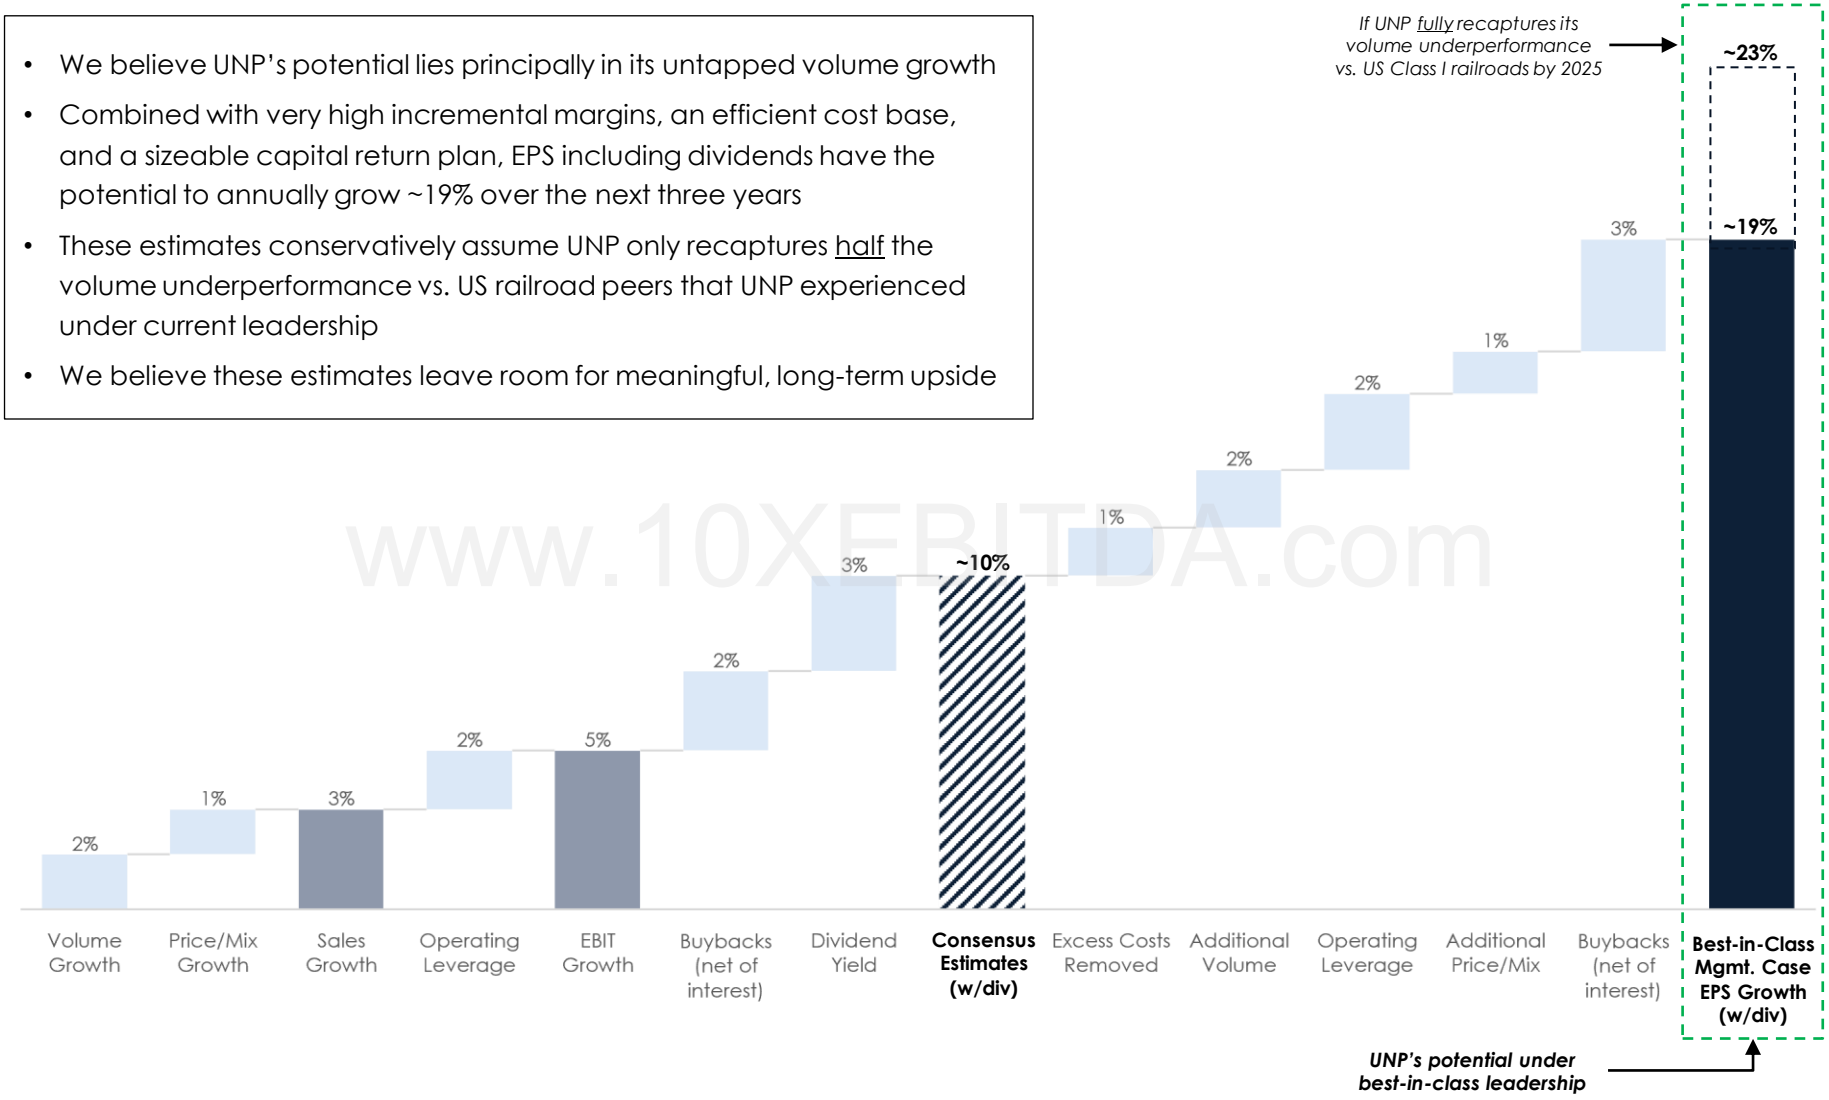

See Appendix for More Details

With best-in-class leadership, UNP's potential is significant

SOROBAN Capital Partners LP

2022A-2025E EPS w/ Dividends CAGR Bridge: "Consensus" to "Best-in-Class Management Case"

- We believe UNP's potential lies principally in its untapped volume growth
- Combined with very high incremental margins, an efficient cost base, and a sizeable capital return plan, EPS including dividends have the potential to annually grow ~19% over the next three years
- These estimates conservatively assume UNP only recaptures half the volume underperformance vs. US railroad peers that UNP experienced under current leadership
- We believe these estimates leave room for meaningful, long-term upside

www.10XEBITDA.com

Source: consensus estimates per Bloomberg and Visible Alpha as of 2/22/2023, Soroban estimates.

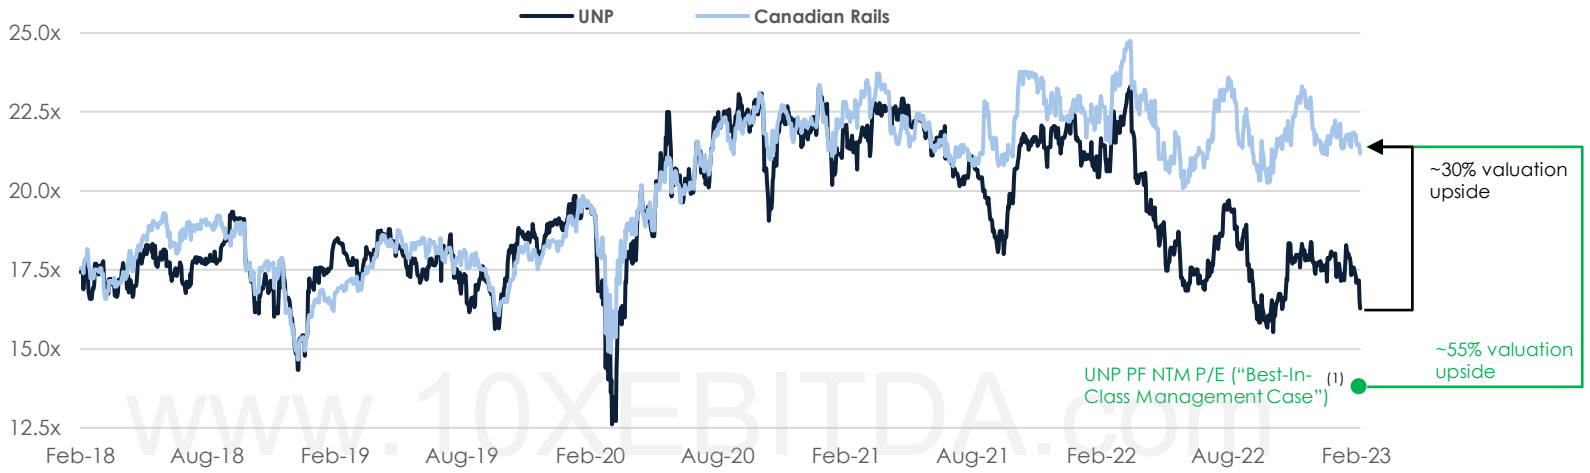

UNP under best-in-class leadership has significant multiple re-rate potential

SOROBAN Capital Partners LP

If volume growth accelerates to UNP's potential, we believe investors will reward this higher growth with a valuation more in line with UNP's Canadian peers and other high-quality US industrial companies

UNP historically traded in line with the Canadian rails but has recently de-rated on poor execution

Rail Multiples (NTM P/E)

~55% valuation upside

~85% valuation upside

Source: Bloomberg as of 2/22/2023. Multiples represent blended forward twelve months. (1) Conservatively assumes UNP only recaptures half the volume underperformance vs. US railroad peers that UNP experienced under current leadership. Calculated using consensus forward EPS and applying an ~18% increase as detailed on slide 31.

SOROBAN Capital Partners LP

Soroban's mission is simple: we want UNP to prosper. Unlike typical shareholder engagements which come with numerous demands, Soroban has only one ask: install new leadership who can get the trains to operate safely and on time

- The Board must hold Lance Fritz accountable for UNP's failures during his eight-year tenure as CEO
- It is imperative for the Board to pair the best railroad in North America with the best leadership team to capitalize on what we expect to be a "golden age of railroading growth"
- Fortunately, we believe Jim Vena would be keen to return to UNP in a new leadership role
- We believe UNP shareholders would overwhelmingly support a change in leadership, as new best-in-class leadership could potentially double the stock price and create ~$67bn of incremental shareholder value over the next two years
- UNP's key constituents – employees, customers, regulators, the US economy, the environment, and shareholders – would all significantly benefit from an efficiently operating railroad

www.10XEBITDA.com

Soroban is completely committed to seeing that these changes be expeditiously implemented

Soroban's estimates are significantly above consensus yet leave room for meaningful, long-term upside

SOROBAN Capital Partners LP

- Our estimates conservatively assume UNP only recaptures half the volume underperformance vs. US railroad peers that UNP experienced under current leadership. We believe these estimates leave room for meaningful, long-term upside
  - Volumes: we believe with best-in-class leadership volume growth can accelerate. Today, UNP volumes are 15-20% below peak. Under current leadership, US and Canadian Class I railroads have outgrown UNP in volumes by ~10% and ~17%, respectively
  - Incremental Margins: UNP currently has substantial excess capacity, meaning additional volumes require de minimis capital investment as UNP is only running at ~80% of full network potential today. As a result, volume growth will come at very high incremental margins
    - *"I mean we've got capacity up to -- we [ran] over a decade ago close to 200k 7-day carloadings for the entire year. And we're around -- we're less than 170k today. So we've got excess capacity."* – September 2019 conference
    - Investors believe management can do better than guided incremental margins of mid- to high 60%s: *"And then just to maybe clarify on the incremental margin range… mid- to high 60%s, I would think maybe you can do a little bit better or towards the high end of the range because it sounds like you've got 60% to 70% capacity on the network, or you have 30% to 40% additional."* – JP Morgan, May 2021 investor day

(1) Conservatively assumes UNP only recaptures half the volume underperformance vs. US railroad peers that UNP experienced under current leadership. (2) Elevated due to excess costs in 2022 base.

Appendix: "Golden Age of Railroading Growth"

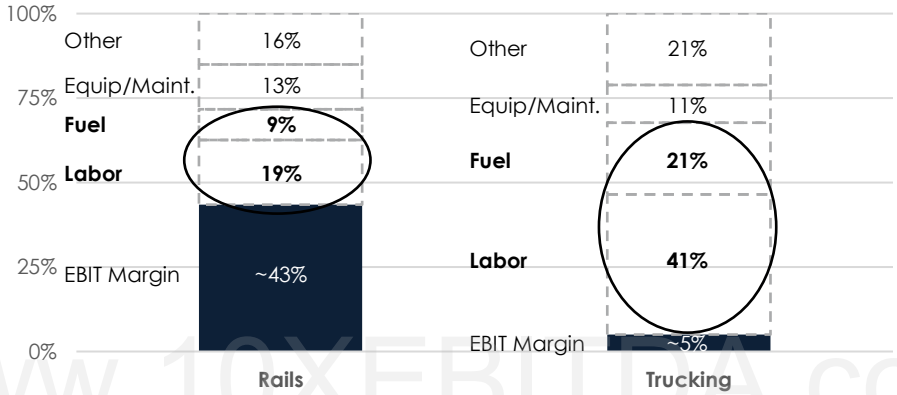

www.10XEBITDA.com

"Golden age of railroading growth" (1/4): trucking market facing structural headwinds

SOROBAN Capital Partners LP

- Inflationary pressure from labor and fuel are pressuring trucking margins, causing truckers to raise rates. Trucks set the marginal price for most freight movements, creating a favorable (and rising) pricing umbrella for rails
- As truck prices need to rise to offset inflationary costs, rails become more attractive, particularly over longer lengths of haul
- Rails should be significant market share gainers going forward

Trucking margin structure magnifies impact of fuel and labor cost inflation

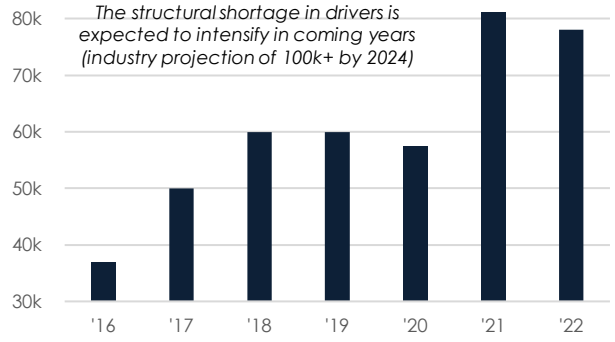

Source: Soroban analysis. Rails cost profile per UNP's 2021 cost breakout. Trucking cost profile per the American Transportation Research Institution for 2021.

www.10XEBITDA.com

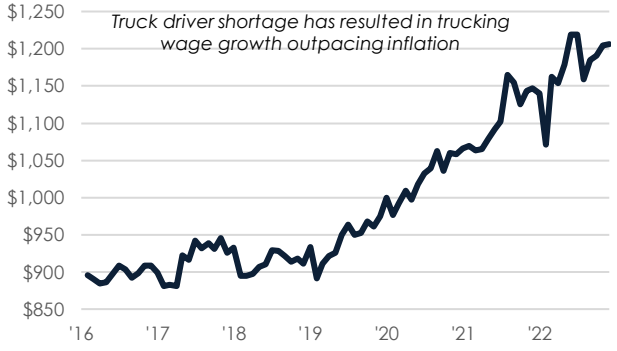

Trucking rates will be structurally higher, which makes rails comparatively more appealing (and enhance pricing power of rails)

"Golden age of railroading growth" (2/4): US undergoing new industrial investment super cycle

SOROBAN Capital Partners LP

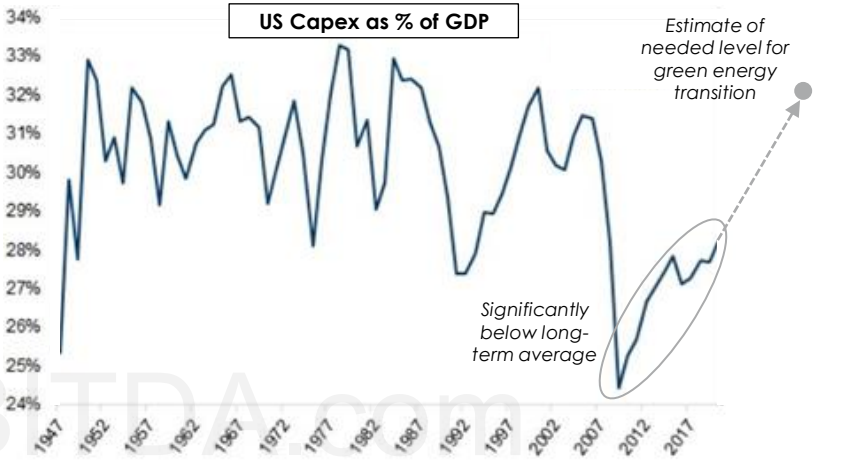

- The large capital investment boom in the 2000s and the subsequent demand shock of 2008/the GFC resulted in substantial excess capacity through much of the 2010s, leaving little need for new capacity investment
- This extreme underinvestment over the last decade is now colliding with pressure to reshore critical supply chains and invest for the capex-heavy "green energy transition," positioning the US for a robust industrial investment cycle
- This large industrial capex will be disproportionally served by rails due to the large scale and heavy nature of materials

US fixed assets are increasingly aging

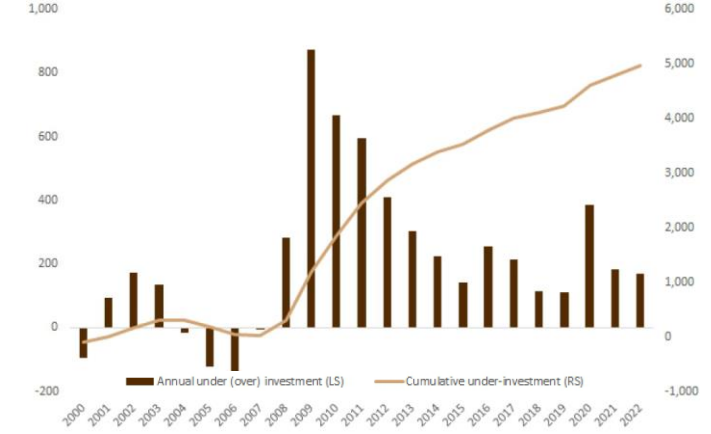

Source: BEA, Datastream, Barclays.

US capex is significantly below historical levels

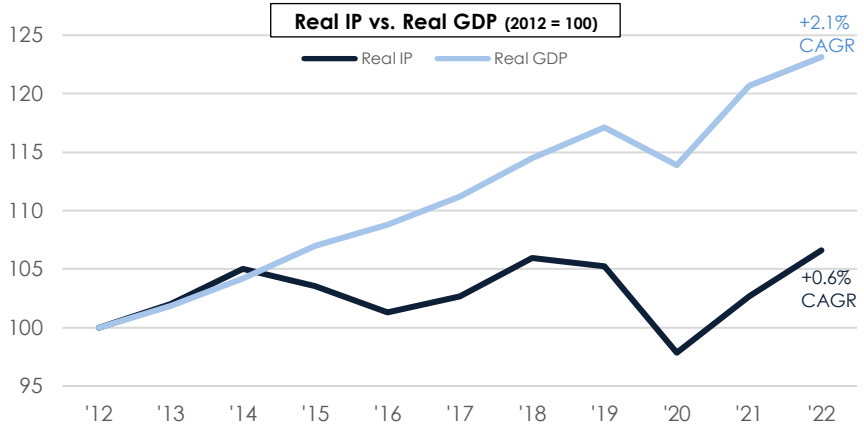

Source: Federal Reserve Economic Data, Goldman Sachs.

US private under-investment has totaled ~$5 trillion over the last 20 years

Source: US Census Bureau, UBS.

US industrial production is due for a catch up to GDP

Source: Federal Reserve Economic Data.

www.10XEBITDA.com

"Golden age of railroading growth" (3/4): increasing focus on scope 3 greenhouse gas emissions

SOROBAN Capital Partners LP

Efficiently run railroads are key in the fight against climate change, as railroad growth will largely come at the expense of the less environmentally friendly alternative (trucks)

- Railroads are significantly "greener" than trucks (the main alternative). Moving freight by rail instead of trucks on average lowers greenhouse gas emissions by up to 75%
  - "…*freight railroads account for just 0.5% of total U.S. greenhouse gas emissions and just 1.9% of transportation-related greenhouse gas emission*" – US Environmental Protection Agency and Association of American Railroads
- Today, North American Class I railroads are significantly reducing global carbon emissions. Cumulatively, they contribute to ~124 million metric tons of carbon emissions savings per year. This is equivalent to removing ~27 million cars off the road, powering the electricity use of ~24 million homes, or carbon savings from ~34k wind turbines…
- …yet rails only ship ~8% of US freight after losing substantial share over the past two decades. As companies increasingly focus on reducing scope 3 greenhouse gas emissions, we expect rails to be significant market share gainers
- While rails are unlikely to ever capture all truck market share, small shifts from a low base have a significant impact. As recently as two decades ago, rails had an estimated ~10% share of US freight, which would be a ~25% increase in volumes vs. today

Rails contribute to ~124 million metric tons of carbon emissions savings per year

	Rails GHG Emissions (metrics tons CO2/yr)	Illustrative Truck Multiplier	Equivalent Trucks GHG Emissions (metrics tons CO2/yr)	GHG Savings from Rails Industry (metrics tons CO2/yr)

"Golden age of railroading growth" (4/4): significant excess capacity on rail networks

SOROBAN Capital Partners LP

Incremental volumes will come at very high incremental margins and require minimal capital investment due to significant excess capacity on UNP's rail network
